AMAZONAS

Amazonas Group understands that taking care of our planet and assuring a better environment for future generations, is part of our daily duties.

For 72 Years, we have developed projects to promote awareness and knowledge within our factory employees, so that we can help create a practical and efficient future of living in a sustainable WORLD.

Since rubber is 100% recyclable, our Group does not want to allow nature to decompose it for THOUSANDS of years. Noble RAW material and utilized in many segments of our groups business; the rubber left over from our production lines is separated, treated and thru clean technology, is recycled into the soles used in our Eco line.

Take the next step and turn the page to see our awesome Eco collection.

THANKS
FOR BEING
green
